

Lenel Integration - DVTEL as the Front End

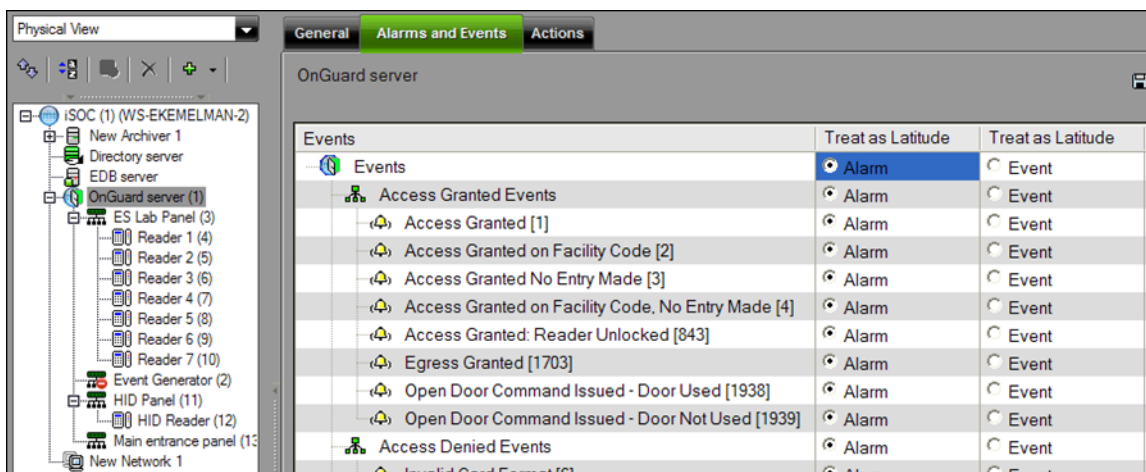

Professional Engineering Services

DVTel's Professional Engineering Services (PES) Group provides custom automation and operation and 3rd party integration to DVTel's intelligent Security Operations Center (iSOC) platform so that every DVTel solution has the ability to be tailored to meet the requirements of the customer.

Lenel provides an access control solution. This integration is between Lenel and DVTel's Latitude Network Video Management System (NVMS).

Access Control Entities in Latitude NVMS

Users can create an OnGuard server in Latitude and view OnGuard entities on Latitude NVMS trees.

OnGuard Events Monitored via Latitude System

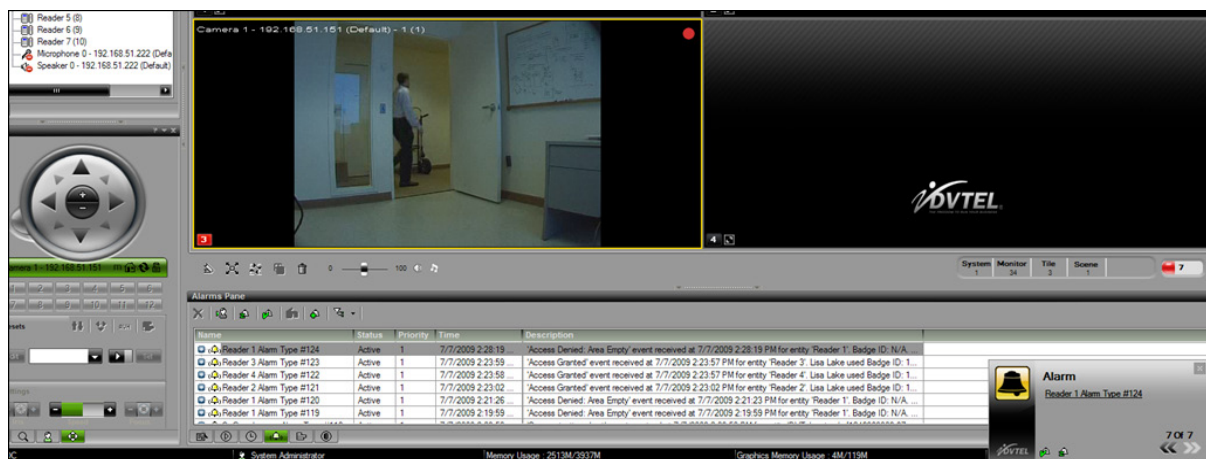

Access Granted, Access Denied and an additional selection of OnGuard system events can be monitored in Latitude and configured to trigger an alarm or dispatch an event in Latitude.

Configure Latitude actions upon OnGuard events

User can configure many actions that will be executed by dispatched events from OnGuard. For example: Upon door open event, send a camera to a pre-defined preset.

Associate Readers with Cameras

Latitude cameras can be associated to OnGuard readers allowing OnGuard reader events to begin recording before and after the trigger time.

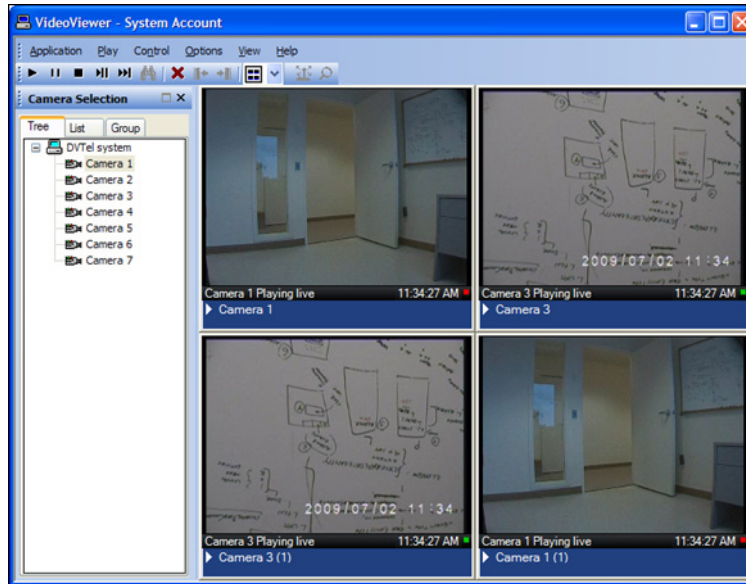

Lenel Integration - Lenel OnGuard as the Front End Professional Engineering Services

When Lenel OnGuard is the front end:

Live/Recorded Video Support

Users can view live and recorded video from Latitude cameras within OnGuard applications.

Control PTZ cameras

Control PTZ cameras with supported Pan, Tilt, Zoom, Focus, Iris and Go to presets operations.

Alarm Monitoring and Map Support

Monitor Latitude camera accessibility and motion detection events via OnGuard's Alarm Monitoring application, in addition to launching video via camera icons in maps.
